Introduction

Introduction

This serves as a technical overview of the backend, with requests and all models. Where possible we provide examples on how the payload could look like.

Web Service

/v1/

`get /v1/`

hello

Responses

200 Success

Type
string

/v1/exposed

`post /v1/exposed`

Endpoint used to publish the secretkey.

Request Headers

Field	Type	Description
User-Agent *	string	

Request Body

Field	Type	Description
*	ExposeeRequest	N/A

Responses

200 Success

Returns OK if successfull

Type
string

400 Bad Request

Either key is not base64 or no auth data given

/v1/exposed/dayDateStr

`get /v1/exposed/{dayDateStr}`

Responses

200 Success

Returns ExposedOverview, which includes all secretkeys which were published on dayDateStr.

Type
ExposedOverview

500 Internal Server Error
